Continuing our detailed review of Schroeder Thermodynamics, we examine secondary source materials and community-driven data points:

The Boltzmann Factor An Introduction to Chad provides a lesson on Entropy and the Second Law of Problem 4.3. A power plant produces 1 GW of electricity, at an efficiency of 40% (typical of today's coal-fired plants). (a) At what $\hat{A}$... This lecture comes from a course on With a solid understanding of entropy, we can now define temperature mathematically. Back in section 1.1, we said that $\hat{A}$... When we have two systems that interact with each other, we can count the macrostates for each and the macrostates for the total $\hat{A}$...
